TRAINING REPORT

Head of Department: Software infrastructure

Salam Prof.Sami.

Training tasks that have been accomplished.

1- I am currently working on a portfolio website for me using HTML and CSS because the project manager wants me to improve my frontend skill but the manager knows I'm having a hard time and am late in my graduation project so I'm improving my HTML and CSS skills in the big project which is my graduation project and i did all frontend work in the graduation project with little help from my team.

2- I went with the project manager to Zara company to learn how to collect requirement and learn how to contact with other companies for work in professional level.

3- Staying close to the engineer Omar Al-Hourani, who specializes in the field of Frontend, to develop my skills in the field of Frontend, and I helped him with some of the work he was doing, such as the modification of some errors and do some small changes that he wants for the Eskan Bank project that thier team currently working on.

4- They asked me to improve my emailing skills by helping Ms.Isra Alomari and learning from her how to do professional work emails because it's very important to learn how to email at the professional level so I could contact with the customer at professional level.

Thanks for your time reading this prof.Sami
